## Nature Discovery Park, nature trails and Geology Park

The Säntis/Schwägälp Nature Discovery Park and its nature trails help you to appreciate the unique natural environment. This is where explorers young and old can find out more about the moorlands, forest, alpine farms, local traditions and much more besides.

Reproduced courtesy of swisstopo (BA057122)

This map shows you the route of all the nature trails and the locations of all the information boards in the Nature Discovery Park.

### Säntis/Schwägälp Nature Discovery Park

Marvel, discover and learn – the Nature Discovery Park at the foot of Mount Säntis impressively communicates the nature, culture and tradition of this region. Switzerland Tourism has awarded the park its prestigious “Blue Gentian” seal as part of the “Pure Switzerland” project that recognises good environmental tourism.

### Fascinating nature trails

The nature trails in the Nature Discovery Park invite you on a voyage of discovery. A series of signposts takes you to the main sights; information boards explain points of special interest. The Moorlands nature trail takes you through the unique moorland landscape. The Alpine Farming nature trail describes life on alpine farms. The Forest nature trail informs you about how the forest is used for recreation and farming. The Man & Environment nature trail shows how man has shaped and preserved this landscape. The Geology nature trail turns the history of the earth into an exciting adventure.

### Geology Park

Right by the Berghotel Schwägälp, a spiral path has been created to reveal the mystery of the alpine rock going back millions of years. A geological diorama shows the habitat of that time complete with its inhabitants, turning the earth’s past into a fascinating experience.
